

Four Slovaks Watched a UFO Above Poland

Four Slovak citizens went from Slovakia to Bydgoszcz, Poland, to see the World Athletic Championship on 7 July 2008. When they were going through a village of Topola Krolewska - 2 km far from the Leczyca town, 52°04'44"N - 019°11'58"E - they noticed a strange, disc-shaped object in the air.

The UFO went from West to East and moved slowly cca. 100 m above the ground. The disc was dark, metallic and has three lights: one little white on its front, one red and pulsating on its rear and one green, which moved around on the object's circumference in the counter-clockwise direction. The object was seen through 3 minutes, from 22:30 to 22:33 hrs (20:30 - 20:33 GMT). The weather was good: a half of the sky was covered with clouds, a wind was light. The UFO was seen from the Slovaks' car. They did not stop to watch it but went towards Wloclawek. They were excited by this night adventure and informed his friends in Czech Republic about that sighting. I was informed about it on Jul. 11th, by Mr. Lubos Safarik.

In the same day I was informed about similar phenomenon, which had been watched by people of the village of Maksymilianowo at Bydgoszcz, cca. 10 km from Bydgoszcz - 53°13'01"N - 018°02'13"E, by the Mr. Mariusz Fryckowski - a ufologist of Tuchola. The UFO hovered above a marshalling hill of the local railway station. It lasted a couple of minutes, later the UFO went towards the Bydgoszcz town. The whole event started before a midnight, cca. 23:45 of the local time. Mr. Fryckowski has just gone to investigate this incident.

I shall inform you about a progress of the investigations in those cases.
