

POLISH BORDER GUARD ALSO WATCHED UFOs

By PBG Capt. Ret. Robert K. Leśniakiewicz

I started to collect the information about the UFO-sighting and Close Encounters with Aliens on 13 September 1973, when I had seen the triangle shaped Unknown Flying Object above the Tatra Mts. It was the second UFO-sighting in my life. The first one I had in Summer 1966, when my schoolmates and me had watched also triangle shaped, bright white UFO over the German part of the Zalew Szczeciński lake, from a board of m/v *Alina* on her route from Szczecin to Świnoujście.

I served for the Polish Border Guard from 1975 to 1994 – in a period 1979-1986 I was in the PŻB/Pol-Line A/B Ferry Terminal in Świnoujście, and in the next period from 1986-1994 I was in the Checkpoint Łysa Polana – Javorina on the Polish-Slovakian border – 30 km far from Zakopane in the southern part of Poland. During my duty I met with the UFO-incidents several times – and I wrote two books about them: *UFO nad granicą* (Kraków 2000) – [1] and *Projekt Tatry* (Kraków 2002) – [2]. This report is based on them. Moreover I brought some information from the **Mr. Bronisław Rzepecki** of the Cracovian UFO Researches Group files – [3] and the Center for the UFO and Anomalous Phenomena Researches in Kraków (Cracow) - CBUFOiZA files – [4]. And this is my report:

1. **DD/NOTSUB-Id.** On 19 March 1986 at 16:20 hrs., two Visa-Officers **Lt. Janusz A.** and **2nd Lt. Wiesław R.** on a board of the m/f *Wawel* saw a strange event. Three fountain of water rose up at the ferry on her way from Ystad, Sweden to Świnoujście – 25 miles from that port – 14*30'E and 54*33'N. Neither they, nor the crewmen of the m/f *Wawel* could get to know, where those strange 'projectiles' were fired towards her. I judge firstly, that those 'projectiles' were meteors, however in 1990s those areas have been very often haunted by black "flying triangles". Moreover nearby that point sunk down another polish ferry boat – m/f *Jan Heweliusz* – in odd circumstances and for unknown reasons. [1]

2. **CE4.** On 15 December 1981, the PBG patrolmen found on the Polish-Germany border snow-belt traces of one man, who had crossed the border to East Germany. On 17 December the man was delivered to the Checkpoint Świnoujście – Ahlbeck by German *Grenzschutz Polizei*. During an interrogation he stated that he had been abducted by Aliens, who dropped him off near Dresden, where he was stopped by police. Finally he was recognized as mentally ill and released. [1]
3. **2NLs.** In July 1984 and 25 June 1985, in Świnoujście were seen balloon-like UFOs, which hung above the town through several hours. They were seen by many people, including policemen, PBG and Eastern Germany officials, Polish, East Germany and Soviet soldiers and civilian people. Those ‘balloons’ could not be caught by radars. They both were on an altitude about 9.000 meters above Earth. [1]
4. **Several NLs.** In the night 16/17 August 1980, **PBG War. Off. Bolesław K.** and 4 younger officials from Checkpoint Świnoujście – Port Rybacki observed a ‘dance’ of a group of Nocturnal Lights above dark waters of the Zatoka Pomorska bay. At dawn those mysterious dancing lights went down to the bay. [1]
5. **3NLs.** On 6 January 1986, at 18:20 hrs., I and three other officers: **2nd Lt. Ryszard L., War. Off. Andrzej S., War. Off. Marek L.** saw three very bright flashes of the blue-white light on a surface of the Zalew Szczeciński lake. They were seen also by Harbormaster Officer Ryszard S. and II-nd Mate of the m/f **Mikołaj Kopernik**. They were off the East German village Ueckemuende. [1]
6. **DD.** On 27 June 1966, between 06:00 and 09:00 hrs., I with my 60 schoolmates and teachers watched a strange, triangle shaped, white ‘balloon’ above the Zalew Szczeciński lake from a board of the m/v **Alina**. They went from Szczecin to Świnoujście. At 9 o’clock the UFO disappeared in mist above the German part of the lake. [1]
7. **Several NL/BOLs.** On 7-9 September 1985, there was a strong rescue operation on the Southern Baltic Sea areas. Almost 30 ships and warships, one plane and 4 helicopters looked for Swedish cargo vessel m/v **Cona**. During that action crewmen and PBG officials observed strange red lights above the stormy sea waters. They appeared from nowhere and disappeared as mysteriously as they had appeared... [1]
8. **NLs.** On 24 June 1983, between 22:30 and 24:00 hrs., 4 soldiers and 4 PBG officials observe something, which they named later ‘the air parade’ over a town of Dziwnów. They saw a squadron

of the pink flying disc, which had come from the Zalew Szczeciński lake and moved towards the sea. That spectacle repeated several times. The yellow ball hung above the pink discs. Finally it shacked itself and exploded into small pieces, which vanished. [1] [3]

9. **DD/RV.** My friend **PBG War. Off. Wiesław K.** of Świnoujście watched and photographed the dark flying disc, which had come from the Zalew Szczeciński lake and crossed the Polish-East German border in June 1980. Unfortunately, that photo was overexposed. [1]
10. **CE0/NL.** On 18 April 1988, at 20:40 hrs., some PGB officials of the PGB Station in Stolec at Dobra Szczecińska watched two orange BOLs, which hung above a forest on the Eastern horizon. In the same time three civilian witnesses driving a car saw them also. Suddenly they noticed a dark EBE in a front of them. They wanted to chase it, but the EBE was very much faster than their car and escaped to the forest. They could not run among trees. After several minutes the BOLs disappeared. [1][3]
11. **CE1/NOTSUB-Id.** Three soldiers or the PGB officials saw like a triangle shaped object, which had emerged from the sea waves. It rose up 200 meters and suddenly went away with a tremendous speed. [1]
12. **CE2.** Koszalin - in the night 4/5 August 1989, between 01:00 and 03:00 hrs., circa 50 schoolchildren with their teachers and two policemen observed three strange lights, which hovered 1 meter above a ground. They firstly thought that it was a plane or helicopter, but the UFO moved very slow. After 30 minutes UFO took off and disappeared. Policemen, who came on the landing place fond traces of the 4 legs and a circle of the burned grass. They brought samples of the soil and grass, which nest were sent to the Criminal Laboratory of the District Police HQ in Cracow. [1][3]
13. **CE2.** Koszalin again. A beginning of September 1989. In the same place the same UFO was seen by local people, who called the police immediately. Two patrolmen came on a place and saw a UFO with three red lights. It took off and vanished from their view... No traces were fond. [1]
14. **NLs.** Puck town near Gdańsk. 4 civilians saw 7 orange Nocturnal Lights hovering above the waters of the Zatoka Gdańska bay in one evening in August 1994. The same objects were watched by officials from the local PBG Station. [1]
15. **DD.** One Jordanów woman with two other persons witnessed the classical UFO hovering above sea waves 2 km far from a beach

- in Jurata on the Hel peninsula, on a beginning of December 1991. The white UFO was also seen by officials of the local PBG Station and other civilians. [1]
16. **DD/CE0.** This is famous Gdynia incident, which took its place on 21 January 1959 some witnesses noticed a bright 'meteor', which plunged into the port's basin. In the next day, an EBE was caught by MPs in a circumstance of the Harbormaster Office of the Gdynia Naval Base. Another EBE was found either by police patrolmen or the PBG patrol on the town's beach. Both EBEs were later transported to the Soviet Union. [1][3][4]
 17. **2NLs.** Bartoszyce town, on 17 January 1991. I and my friend policewoman **Police Sgt. Krystyna W.** saw two Nocturnal Lights, which moved very quickly above Northern horizon. They were over the Russian territory. [1]
 18. **NLs.** Dołhobrody is a small village at the Polish-Byelorussian border. In the whole 1970s, there were observed strange light phenomena on the Soviet side of the border by local peasants and PBG officials from the near PBG Station. They were BOLs, big shining mushrooms, poles, lenses, jelly fish, and so on. Rumors said that they were results of the Soviet tests with the newest nuclear weapon, however there have never found a higher level of the radioactivity till the Chernobyl disaster. [3]
 19. **NLs.** The same sort of phenomena was observed for a very long period in another small village of Zgoda. They have been unexplained since 1970 to this day! [3]
 20. **NL.** My friend **PBG Lt. Col. Wojciech Sz.** of the PBG HQ in Nowy Sącz informed me about the Nocturnal Light in the form of the BOL, which had been observed by hut owner and several dozens of tourists on the Prehyba saddle in Summer 1988. He witnessed it too. The BOL went from Slovakia towards the North with a tremendous speed. [1]
 21. **CE2/DD.** Tatra Mts. In September 1957, two young men sitting on a shore of the Czerwony Stawek Pańszczycki tarn suddenly noticed the dome shaped UFO, which appeared 10 meters above the tarn's water. They got fright and run away, but the UFO moved off in the different direction – towards the Polish-Slovakian border, where it was seen by Polish and Slovakian border guards. [2][3]
 22. **DD.** Two young PBG patrolmen and two PBG officers independently from each others watched a strange, dark flying disc in one beautiful morning in August 1961. It was near the Checkpoint Łysa Polana – Javorina in the High Tatra Mts. The UFO came from the East. It hovered for a while and after that it moved

- with increasing speed towards the South. It did not cross the border. Probably it was seen also by Slovak border guard. [2]
23. **DD.** The High Tatra Mts., on 13 September 1973, I with my 30 schoolmates, two teachers, a guide and a guide's wife saw the white, triangle shaped UFO, which moved very slow from Slovakia towards Poland on a very high altitude. The UFO was also observed by thousands of people in Poland and Slovakia. Moreover it was watched by professional astronomers of the Skalnaté Pleso Astronomical Observatory, Slovakia and Astronomical Observatory of the Jagiellonian University in Cracow. The all astronomers confirmed the UFO's reality. They stated that the UFO hovered above 100 km over the Earth – in the upper ionosphere. It was more than 100 meters long and its color was bright white. It was observed by **Prof. Dr. Kazimierz Kordylewski Ph.D.** and **Prof. Dr. Zbigniew Dworak Ph.D.** – the both prominent scientist of the Jagiellonian University, and also by **Prof. Dr. Zbigniew Schneigert** of Zakopane – the expert Number One in Poland on the rocket-nuclear weapon. I recognized it as a real TRUFO-case. [2]
24. **NL/CE1.** Zakopane, 17 January 1979. In that day, at 07:30 hrs. many people observed strange white light above the town. It moved slowly from East to West. The **Police War. Off. Antoni Szreder** made 36 photographs of the UFO. The photos and film were sent to the Police HQ in Cracow. The UFO went also above the local power plant and switched it off for several minutes. One man witnessed it. [2][3]
25. **DD/IUFO.** Zakopane – the Head Buss Station, on 8 August 1988, at 06:55 hrs. I and 5 other witnesses observed an overflight of the jellyfish shaped, almost transparent UFO above Northern parts of the Zakopane town. [2]
26. **NL.** Zakopane – in one evening of August 1988. Four drivers of the Zakopane Buss Communication Enterprise and **PBG 2nd Lt. J. W.** (personal data reserved) saw a NL, which flew from North to South – towards the town of Liptovsky Mikulas, Slovakia. In a few minutes later they heard a strong detonation from there. They came to a conclusion, that they had seen the Soviet rocket missile which had dropped down on a military area near Liptovsky Mikulas. [2]
27. **DD.** My friend **PBG Lt. Stanisław Piechowski** drove his car with his friend **Mrs. Teresa L.** and her son **Patryk** on the road No. 47 from Nowy Targ to Zakopane, on 26 December 1989. At 15:30 hrs. they suddenly noticed a comet-like UFO, which hung

- above the Western horizon. They watched it through 30 minutes. [2]
28. **2 times NL-case.** In January 1990, I alarmed two times officials of the PBG Station in Palenica Białczańska, because I saw strange lights in the forest surrounding the Checkpoint Łysa Polana – Javorina and on a road No. 960. We searched it very carefully and found nothing. Now I think, that I saw a phenomenon very similar to one seen in the Pennine Mts. in England. [2]
 29. **NL/NOO(?).** Zakopane town again. On 28 April 1993, at 20:30-20:32 hrs. I watched strange star-like light in the sky. The UFO appeared above the Slovakian part of the Tatra Mts. and came towards me. Suddenly it turned to East and slowly floating over mountains vanished behind the horizon. Now I think, that I could watch an American spy-plane, which had taken off from the Brindisi AFB, Italy and gone above former Yugoslavia, Hungary, Slovakia and Ukraine to Izmir AFB in Turkey. This is a distance 10,000 km, which can be covered by modern spy-plane like American *Aurora* or Russian *Uragan*, which can go on an altitude 33,000 m – like that UFO did, which I have checked at the Poprad-Tatry Airport's radar station two days later. [2]
 30. **NL.** On 19 January 1994, at 18:35 hrs. I drove my car from Zakopane to Łysa Polana on the road No. 960. When I reached a series of very dangerous turns, I noticed a bright white light above Slovakian Byelanske Tatra Mts. range. The light was star like, but it was not any star or bright planet. It disappeared after 1 minute. From my colleagues of the PBG Station in Jurgów I know that there were a lot of UFO-sightings made by them. The all white lights were seen above the Byelanske Tatra Mts. The same opinion I heard from the Slovak policemen and border guard. [2]
 31. **Collision with IUFO?** The Dolina Olczyska valley is a part of the Polish Tatra Mts. On 11 August 1994, there was a collision between the Tatra Voluntary Mountain Rescue Team (TOPR) helicopter *Sokół* and something invisible. Two pilots and two members of the TOPR were killed in that crash. It was filmed by a tourist. Famous Polish ufo-researcher **Mr. Kazimierz Bzowski** of Warsaw photographed the dark, ball shaped UFO on 4 July 1976. It is strongly possible, that the TOPR helicopter was hit by Invisible UFO there. Police gave up an investigation for a lack of evidences reason. [2]
 32. **NL.** My friend **PBG Sgt. Józef K.** went together with his wife **Elżbieta** from Cracow to Nowy Targ on a road No. 7/47 in October 1989 night. When they left Cracow, they noticed a strong,

- red light in the sky. It followed them sometimes on their right and sometimes on their left side. The NL vanished, when they came among the Nowy Targ first houses. [2]
33. **CE2 with the IUFO.** Jordanów. This is the most intriguing case, which I have ever survived and registered. It occurred in the night 1/2 November 1988. My sister **Wiktoria Leśniakiewicz B.A.** and me were on the town's graveyard at 23:50 hrs. We were lighting up some lamps and candles on our Grandparents' graves and starting to pray, when we suddenly heard a whistle in the silent night... Next we heard a choir of strange voices. Two minutes before midnight we started to hear a noise of the falling rain. It was almost zenithal rain, but no one drop dropped on us. Weather was clear, the Moon shone bright and little clouds slowly crossed the skies. We finished and went to our home. We did not see any object in the sky or around us. Now we think that we had a meeting with an IUFO... [1][2]
34. **RV/IUFO.** Jordanów again. On 27 December 1994 I went for a walk with my camera. The weather was not so good, but I made several photographs of the Mt. Ciosek (555 m above sea level) and other mountains surrounding Jordanów. When I developed a film, I saw a strange object in blue color, which had floated above a slope of the Mt. Ciosek. Later I made also several photos of the Invisible UFOs in a circumstances of my town. In those days, some Jordanów inhabitants felt one's presence in their homes. It is possible that Aliens visited us in some nights at the end of 1994. [1][2]
35. **NL/RV.** It took its place in Jordanów on 25 October 2002. My wife **Anna**, my sister **Wiktoria**, my cousin **Mr. Kazimierz Wójtowicz** and neighbor **Mrs. Jolanta Ł.** observed from 19:00 to 20:16 hrs. two strange lights, which hovered in the sky nearby a top of the Mt. Przykiec (741 m above sea level). I made 8 photographs of those milk-white lights. I measured angles of the azimuths and put them on a map. It appeared that the both of them had hung above a top of the Mt. Koskowa Góra (868 m above sea level), 11 km north on Jordanów and on an altitude 2,000-5,000 meters. Now I think that it was no UFO but two reflections of the projectors, which had lit a place of the cell telephones and TV transmitter's construction. However, I am not in the able to prove it now, but I shall do it in the nearest future. [4]
36. **NL/BOL.** It occurred in Mniszków k./Jeleniej Góry in February 1986. My friend **Miss Magda Kraus** of Wrocław with her father and some MP-soldiers saw a bright, red in color BOL, which flew above Góry Kaczawskie Mts. range from East to West. It is

- possible that that BOL was the Soviet missile fired from one of the Soviet Rocket Forces base in Poland. [1]
37. **NLs.** There were a lot of the NL-type sightings in the Karkonosze Mts. in December 1993. Local people and tourists saw many times strange NLs, which floated above tops of the Mt. Śnieżka (1,605 m), Mt. Wielki Szyszak (1,509 m) and Mt. Szrenica (1,362 m). Those UFOs were seen in Czech Republic by a lot of people. That ‘invasion’ was over in January 1994. Nobody could explain it. [1]
38. **DD/NL.** My friend **PBG Lt. Eugeniusz Czerw** and his wife **Małgorzata** went in a buss from Lubsko to Jasień, on 18 December 1993, at 20:30 hrs. They were looking through the buss’ window, when they noticed a very bright, milk-white light. It was emitted by a big flying disc, which hovered above a forest. Finally it disappeared from theirs view. [1]
39. **NL/UOO?** This is another strange NL-case, which was observed by many people in an evening on 20 August 1979, almost on an area of the whole Poland. That phenomenon was named the Great Polish Bolide by Polish UFO-researchers. Firstly it was observed near the Cap Rozewie. Next it was seen above Elbląg, where it made another turn towards Toruń. Over Toruń it made the next turn going in the S-SE direction. It was seen also above Solina in Bieszczady Mts., as it crossed the Polish-Ukraine border. Firstly investigators thought that it had been a meteor. Later they judged that it could be the Soviet manoeuvring ballistic missile. During my private investigation, I got to know that that ‘bolide’ was seen also in Sweden by soldiers of the AA-unit in Karlskrona. They judged that it is very similar to the Russian SS-18 missile fired from a Soviet SSBN or rocket-cruiser on the North Atlantic. Now, I think that it was something similar to that, but belonging to an ancient civilization, which had placed it on the orbit 15,000 years ago... Now, I think so, but I can not prove it. [1][2]
40. **NL/UOO?** That phenomenon is known as the December Bolide and it occurred on 2 December 1983. Several hundreds of people in East Germany, Czech Republic, Poland, Slovakia and Ukraine witnessed its overflight on an altitude above 100 km from West to East. That object or a group of 5-8 objects, which looked like a fist of red lights, went along the 51st parallel. They quickly disappeared behind the Eastern horizon. Personally I think that they were the US and Russian killer-satellites, which played a battle in space... My opinion was shared also by **Prof. Dr. Zbigniew**

- Schneigert.** And (probably) this is the truth about the December Bolide... [1]
41. **NL/Crop Pictograms.** The 5 km long terrain between the Or-nontowice and Gierałtowice villages was a scene, where some Crop Pictograms appeared in July 2002. Local peasants and farmers were waved by them and they called the policemen on places, where they had appeared themselves. Police immediately put forward an investigation, but fruitlessly. Some witnesses called on them and stated, that they had seen strange flying balls above the wheat fields. [3][4]
 42. **CE2.** Młynek near Busko Zdrój, on 8 July 1978, at 22:20 hrs. 5 young men and women went to Busko Zdrój through a village of Młynek. On an edge of the village they stopped their car to have a rest. Suddenly one of them noticed strange rectangular shaped object, which glowed with weak greenish light. Shortly after that, two beams of very bright flames appeared. Witnesses got a panic and immediately went away. They informed **Police Sgt. Ryszard Mróz** about that event. He came to the landing place and found a big ring of yellow grass with three smaller circles of the burnt grass inside it. Unfortunately the policemen did not make any remark in his notebook. [3]
 43. **NL/CE1 with 2IUFOs + BOL.** That event took its place in Człuchów, in the night on 8/9 August 1983, at 20:00 hrs. Dozen witnesses observed three rounded 'shields', which shone with red-orange light. They hung above Eastern part of the horizon. Suddenly some of them noticed strange oval shaped 'shadows', which moved towards the 'shields'. They were almost transparent. People called policemen, who also saw that phenomenon, at 22:00 hrs. The sighting lasted almost 4 hours! One girl of Człuchów saw the orange BOL at 01:00 hrs. from her window. I must add that there was also another incident **CE4/PROSSUB-Ia** type on 10 August 1979, but without the police involvement. [3]
 44. **NL + CE3/IUFO + animal mutilation.** It took its place in the Radziejów Stary circumstances in December 1983. Many local villagers observed NLs in that month. One time there was a mass animal mutilation. On one field peasants found almost 300 dead birds for unknown reason. They were examined by sanitary services and veterinary doctors, who have found no traces of toxins or hurts. Local police station investigated that case, but officers have not explained that. The case was given up finally. [3]
 45. **NL(?) – the UFO crash?** That event, which remains the Tunguska Meteorite case in 1908, occurred on 14 January 1993 in Jerzmanowice – a small village 19 km far from Cracow. In that

evening, at 19:00 hrs., something smashed into small pieces a top of the lime rock called Babia Góra and dispersed them in an ellipse with 200-700 m wide radius. The all electrical machines were destroyed 1 km from the place of impact. People sensed a strange, 'chemical' smell. Animals felt dizzy or excited. Detonation was heard 30 km far from the zero point, and a flash of the explosion was seen even in the Zawoja village – 70 km far from Jerzmanowice! In the next day the place of impact was surrounded by MP and some high-ranked officers looked for something there. It lasted 14 days. After that time the Army went away and scientists could research the impact site. They found nothing. Army denied knowledge about that incident – like in the TV serial *The X-files*... Personally I think that it was an explosion of the secret rocket missile or bomb. It could also be the explosion of the micro-thermonuclear charge (less than 1 kt TNT), stolen by the mafia from Russian nuclear stores... [2][4]

That's all. My fellow-UFO-researchers and me think that it is a top of the iceberg and in fact many policemen and policewomen saw UFOs, but they – like their British colleagues – have not wanted to risk their professional careers and good opinion in their milieu. Some of these cases we can explain, but not the all of them. So then, we hope that these unexplained cases are strong evidences of the alien activity on our planet.

The End
