

## **STRANGE LIGHT ON A SLOPE**

By Robert K. Leśniakiewicz (CBUFOiZA, Poland)

In a night on Mar. 4<sup>th</sup>, 2003, between 18:00 and 18:35 hrs (17:00-17:30 GMT) in Jordanów, Poland – 49°38'59"N and 19°50'01"E, one witness noticed a strange light on the SE slope of the Mt. Ciosek (555 m [ca. 1,665 ft] above sea level).

The light was orange in its color and was stayed on a ground on a distance of almost 3 km (1.8 miles) far from a witness. He went home and returned with his camera. He took three pictures of the light with the Canon EOS 3000 QD camera on a film 800 ASA (30 DIN), with  $t = 30$  seconds,  $h = 5,6$  and  $f = 35-78$  mm.

In a next day I wanted to go and see that place, but it was not possible, because off a very strong snowfall. I asked about that NL local peasants of the village of Toporzysko with a zero result. No one saw it.

Personally, I think that it might be a light of the wood-thieves or poachers' car, however it is a very difficult to take that they would be so stupid or impudent to leave their car with switched headlights near a wood...

The Center for the UFO and Anomalous Phenomena Researches in Cracow (CBUFOiZA) received also another report on the NL-type sighting from the Warsaw circumstances.

In the same day and hour, two young men saw a strange, bright 'meteor', which crossed the sky from E towards W, above the Ursus town near Warsaw – 52°11'16" N and 20°53'25" E. It is possible that those two facts are in a coincidence and I think that they originated from the same source: either they were Aliens' flying machines or Russian, Chinese or American secret planes, which had operated over Poland in that evening.

The both incidents are still under our investigation.

Jordanów, Apr. 5<sup>th</sup>, 2003.
