

The Anti-Rocket Shield: Unexpected Positive Aspect

Many Poles are not satisfied from the installation of the American Anti Ballistic Missile (ABM) protective shield in Poland and three nuclear power plants in Poland. They are afraid by various threats: military, ecological and terrorist ones. But except them, there is the only one positive aspect of the ABM and nuke installations in our country - there is a possibility to confirm an interaction between UFOs and nuke facilities on the Earth. I made tis suggestion in my letter to three head of the Polish ufology: Mr. Bronislaw Rzepecki, Mr. Krzysztof Piechota and Mr. Zygfryd Swierkowski:

... but there is the only one positive aspect of the existng of the ABM installations in Poland, which will attract UFO and Ufonauts' interest. So then, there will appear

many reports of the UFO-sightings from the Slupsk town's neighbourhood and the Polish - Russian and Polish - Byelorussia borderland - where will stay the Russian rocket missiles with nuke warheads. We have an unique opportunity to verify and make richer two reports: the Robert Duval and Robert Hastings reports on interactions between UFOs and Earth civil and military nuke installations. Both of them were translated and you can read them, in my blog. (The Cosmic Contacts Club letter # 06/2008, Aug. 22, 2008)

Perhaps it will be the next in the row UFO-flap, which could be compare to the one from the 1980's, when the gunpowder smelled in the whole Europe and the both Superpowers started their military space programs. Or it will be a "creeping" process - somewhere some UFO-sighting, somewhere the CE... I think that it will be that second process. Please don't forget that we must count ourselves with the increasing activity of the Polish and American secret and special services, which will protect two US bases in Poland. But we will be in the able to do it, because we have had our own experiences with the Soviet and communistic special services. Those three Polish ufologists were in the able to collect information about the UFO-sightings nad CEs even in the martial law, which was improved in 1981!

Going back to the American special services, we must take under our consideration this that they will watch also the Polish citizens using the UAV and midget-UAV, which will be taken for the UFOs. So then we must expect a wave of the reports of the UFO-sightings, which the lion's part will be relate to them not to the TRUFO. Now we should wait for reports and testimonies from those regions of our country, where will stay those installations...
